

EXPERIENCED CONSTRUCTION PROFESSIONAL

Brad is a highly skilled Mechanical Mining and Minerals professional with over 25 years of experience across the mining construction industry, fixed plant maintenance, and the automotive sector—spanning both Brownfield and Greenfield operations throughout Australia. He brings extensive expertise in managing complex processing facilities through all project phases, from construction and commissioning to operational handover.

Brad has a proven track record of successfully leading large-scale industrial processing and infrastructure projects, underpinned by a strong understanding of the WHS Mines Regulations & Act. He is also highly experienced in client and contractor engagement, ensuring safe, efficient, and high-quality project delivery.

Most recently, Brad served as the site-based Construction Manager for Calibre/WSP, leading the Rio Tinto/Calibre Integrated Project Team (IPT) on the +\$500 million West Angelas A West Project (WAAW).

Prior to this, he worked with HATCH as a Construction Superintendent on the Kemerton Expansion Project and was previously appointed Deputy Construction Manager on Rio Tinto's \$6.55 billion Robe Valley Sustaining Project (RVS).

Earlier, Brad served as Construction Superintendent at Newmont's Tanami Gold Mine in the Northern Territory. He played a key role in the successful delivery and commissioning of a major plant expansion, including the installation of a new secondary ball mill and associated infrastructure. He also oversaw the construction and commissioning of two gas-fired power stations with a combined output of 101.5 MW, connected via 42 km of 66kV overhead power lines.

A highly motivated and determined leader, Brad consistently demonstrates initiative, professionalism, and the drive to deliver successful outcomes across all aspects of a project.

EMPLOYMENT SUMMARY SNAPSHOT

2024 - 2024	Construction Manager (FIFO) – Calibre/WSP, West Angelas, A West, WA
2023 - 2023	Construction Superintendent (DIDO) – HATCH, Kemerton Expansion Project, WA
2019 - 2022	Deputy Construction Manager (FIFO) – Calibre Group, Rio Tinto Robe Valley, WA
2017 - 2019	Construction Superintendent (FIFO) - Newmont, Tanami Expansion Projects, NT
2016 - 2016	Construction Superintendent - Brightwater Engineering, Boral Orange Grove Quarry, WA
2012 - 2016	Mechanical Coordinator (FIFO) - Calibre Group, Various Rio Tinto Remote sites, WA
2011 - 2012	Mechanical Fitter (FIFO) - BHP Billiton Iron Ore, Yandi Mine Site, WA
2007 - 2011	Mechanical Supervisor (FIFO) - Monadelphous, Various Remote Sites, WA

WORK EXPERIENCE

Calibre/WSP | PROJECT VALUE - \$500 m

Construction Manager | Western Australia | FIFO

Feb 2024 - Nov 2024

Project Snapshot:

West Angelas A West (WAAW)

- The West Angelas A West (WAAW) Project is designed to sustain the current mine production capacity at 35 Mtpa, with ramp-up scheduled from 2026. The project encompasses the development of three new pits: A West 1 (AW1), A West 2 (AW2), and A West 3 (AW3). The goal is to initiate mining activities at AW1 by Q1 2025 and at AW3 by Q4 2025. Located between the existing West Angelas Deposit A and Deposit D, WAAW will link the infrastructure between Hub A and Hub CD and provide critical mining resources to extend the mine life.

Brad Robson

A: Redcliffe, Perth, WA, 6104 | M: 0428 579 797 | E: brad.robson10@outlook.com | [LinkedIn](#)

HATCH | PROJECT VALUE - \$1.50b

Construction Superintendent | Western Australia | DIDO

April 2023 - Nov 2023

Project Snapshot:

Kemerton Expansion Project (KEP)

- Kemerton Expansion Project (KEP) is a joint venture construction team comprising of both Albemarle (Owner) and Hatch (EPCM). This team will deliver all Construction and Commissioning including handovers to the Owner Albemarle of processing Trains 3 & 4 including all associated NPI works. Trains 3 & 4 are essentially a mirror image of the first 2 trains and will double the current plant throughput capacity. Operating at full capacity, the Kemerton plant is designed to produce up to 100 ktpa.

CALBIRE GROUP | PROJECT VALUE - \$1.55b

Deputy Construction Manager | Western Australia | FIFO

June 2019 - Dec 2022

Project Snapshot:

Robe Valley Sustaining Project (RVS)

- Expansion included new haul roads connecting existing facilities, two wet plant processing facilities, new train loadout zone, waste fines storage facility, extension of existing communications infrastructure, high voltage power supply upgrades, temporary construction accommodation, and upgrading facilities within Pannawonica township.

NEWMONT, TANAMI EXPANSION PROJECTS, NT

Construction Superintendent | Northern Territory | FIFO

Jan 2017 - June 2019

Project Snapshot:

Tanami Expansion 2 Early Works - \$750 (US) Million

- Scope included the development and execution of a 5.7m diameter production haulage shaft at a total depth of 1500m. Shaft comprised of a 215m blind sink including concrete lining and raise boring to the remaining depth. NPI work included the construction of a new 2.2km double lane sealed haul road.

Tanami Power Project - \$300 million project

- Scope included construction and commissioning of 2 gas power stations generating a combined output of 101.5MW with 42km of interconnecting 66Kv overhead transmission line. Installation of 440km of DN200 gas pipeline, 2 scraper stations, 3 metering stations.

Tanami Expansion Project - \$150 million project

- Scope included construction and commissioning of an underground loader workshop and explosives magazine, refrigeration plant upgrade, new paste binder silo and delivery system, power distribution upgrade, installation and commission of 2 new water bores, new site data link and communications towers, new warehouse, offices and general buildings. Process plant enhancements such as new Secondary ball mill, belt filter plant, and new pre leach thickener and wet circuit upgrades.

BRIGHTWATER ENGINEERING, PERTH, WA

Construction Superintendent | Perth

May 2016 - Dec 2016

Project Snapshot:

Boral Orange Grove Upgrade Project

- Installation and commissioning of the new Primary/Secondary Plant including a transitional discharge from the new surge pile conveyor to the existing surge pile.
- Provided a direct link between the construction contractors and the client management team; Responsible for coaching and mentoring teams to uphold Health, Safety, Environmental Standards and managed construction verification through client handover.

CALIBRE GLOBAL | VARIOUS PROJECTS

Mechanical Coordinator | Western Australia | FIFO

May 2012 - May 2016

Project Snapshot:

Rio Tinto Yandicoogina - YSP - \$1.8 Billion project

- Construction and commissioning of, Primary and secondary sizing crushing station and discharge conveyor, overland conveyors with transfer stations, stockyard upgrade including new stacker, and a new wet processing facility, along with existing brownfield upgrades. \$1.8 Billion project

Western Turner Syncline – Relief Superintendent - \$1.4 Billion project

- Construction and commissioning of, 25 Mtpa Gyratory primary crushing station and discharge conveyor, 21kms of overland conveyors including transfer stations, surge bin and apron feeders to the Tom Price process plant, and water services to the project. \$1.4 Billion project

Brockman 4, Phase 2

- Construction and commissioning of, 22 Mtpa Jaw primary crushing station and discharge conveyor, 4.4 km overland conveyor to existing plant. NPI works included the construction of a new fixed plant workshop, HV refuel facility, ANFO facility expansion and extensions to the water services to the project.

Duties:

- Supervision of various SMP contracts for Rio Tinto. Reporting directly to the Construction Superintendent, attended pre-start and kick off meetings. Provided a direct link between the construction contractors and the Calibre EPCM client management team, responsible for coaching and mentoring teams to uphold Health, Safety, and Environmental Standards. Managed construction verification paperwork, hold points and ITPs. Accountable for contractors adhering to functional design specifications and compliance with Workplace Health and Safety policies and procedures to ensure a safe workplace.

BHP BILLITON IRON ORE | YANDI MINE

Mechanical Fitter | Western Australia | FIFO

Jun 2011 - Feb 2012

Duties:

- Carried out refurbishment and maintenance of Jacques Gyracone, J65, RB4 and G50 crushers.
- Maintenance of the ore handling plant including but not limited to all types of maintenance across Jaw and cone crushers, product screens, conveyors (including tracking), batch mills, sample stations and all types of breakdowns. Provided high-level job shutdown support and guidance to various maintenance crews.
- Carried out conveyor drive and pulley replacement and associated laser alignments.
- Performed a diverse range of mechanical fitting duties on site and followed up on any issues.
- Liaised with management for scoping upcoming works for shutdowns and other maintenance activities.
- Adhered to and promoted all statutory and regulatory aspects of OHS&E in plant and ensured all BHPBIO guidelines and procedures were always followed.

MONADELPHOUS | VARIOUS PROJECTS

Mechanical Supervisor | Western Australia | FIFO

Apr 2007 - Jun 2011

Project Snapshot:

- Citic Pacific Mining, Cape Preston, Sino Iron Construction Project
- Rio Tinto, Brockman 4 Construction Project - \$101 million contract
- Rio Tinto, CLU 80 Expansion Project - \$100 million contract
- BHPBIO, RPG3 Area C Expansion Project

Brad Robson

A: Redcliffe, Perth, WA, 6104 | M: 0428 579 797 | E: brad.robson10@outlook.com | [LinkedIn](#)

Duties:

- Managed and supervised teams of up to 30 + personnel including multi-disciplined trade professionals including but not limited to, Mechanical Fitters, Boilermakers, Riggers and scaffolders throughout various complex mining construction and expansion projects.
 - Adhered to and promoted all statutory and regulatory aspects of OHS&E guidelines and procedures on site.
 - Ensured the quality, production and environmental requirements of the projects were met and up to all specified standards. Oversaw the work of contractors and inspected for QA/QC.
 - Conducted daily pre-start meetings, reviewed and verified mandatory safety documentation and permits.
 - Assisted in the planning and programming of labor, plant and equipment in accordance with construction requirements in the project. Ensured costs were in line with project budgets.
 - Managed multiple sub-contractors and monitored their work output and costing.
 - Studied and understood production schedules and estimated worker-hour requirements for completion of job assignments.
 - Carried out installation, construction and maintenance across the following areas dependent on project.
 - Shutdown planning with site engineering team, and successful execution of all required brownfield to greenfield interfaces and tie ins.
 - Ball and AG Mill installations.
 - Conveyor assembly including structural steel and all associated drive and mechanical components.
 - Site structural steel erection with associated components such as, Grizzly's, Scalping screens, sample stations, conveyor brownfield upgrades and structural deconstruction.
 - Jaw and cone crusher installations including Sandvik CH880 Cone Crushers.
-

FURTHER CAREER HISTORY

2006 - 2007	Leading Hand Mechanical Fitter (FIFO) - South West Group, Mt Whaleback, WA
2005 - 2006	Service Manager / Director - Pilbara 4WD & Mine Services, Newman, WA
2004 - 2005	Automotive Mechanic - Go West Tours, Bunbury, WA
1997 - 2004	Owner / Operator - Enzed, Perth, WA
1993 - 1997	Motor Mechanic / Workshop Foreman - Pilbara 4WD & Mine Services, Newman, WA
1990 - 1993	Apprentice Motor Mechanic - BP Newman Service Station, Newman, WA
